# Vikas Vaishnav

## Web Developer

Full Stack Web Developer with 4+ years of experience in designing, developing, deploying, and maintaining scalable web applications using Laravel, CodeIgniter, WordPress, React, PHP, and MySQL. Experienced in custom web development, REST API integration, server & hosting management, website security, Cloudflare configuration, performance optimization, and technical troubleshooting. Strong background in ERP development, client communication, requirement analysis, and delivering end-to-end business solutions. Passionate about building secure, high-performance, and user-friendly applications.

## Experience

### Full Stack Web Developer

Muskowl LLP | **2022 - Present**

- Developed and maintained ERP Systems, Business Applications, and Custom Web Solutions using Laravel, CodeIgniter, PHP, MySQL, and WordPress.
- Designed and developed secure REST APIs for third-party integrations and internal business applications.
- Managed Linux Hosting Servers, cPanel, Hostinger, VPS, and production deployments.
- Configured and maintained Cloudflare DNS, SSL, CDN, Firewall Rules, Caching, and Website Security.
- Troubleshooted server issues including hosting configuration, SSL errors, DNS propagation, email configuration, database connectivity, and website downtime.
- Performed website migration between hosting providers with zero downtime.
- Optimized website performance using caching, image optimization, database tuning, and server-side improvements.
- Worked on malware removal, website recovery, WordPress security hardening, and backup management.
- Developed and customized WordPress themes and plugins according to business requirements.
- Built React-based responsive landing pages with modern UI/UX practices.
- Participated in client meetings, requirement gathering, project planning, and technical consultation.
- Worked closely with senior developers while coordinating junior developers and managing assigned project modules.

### Key Achievements

- Successfully developed and deployed multiple ERP systems and business management applications.
- Built and maintained 100+ responsive WordPress websites.
- Managed production hosting servers and resolved critical server issues with minimal downtime.
- Configured Cloudflare security and performance optimization for multiple business websites.
- Improved website loading speed and SEO performance through optimization techniques.
- Delivered secure REST APIs integrated with third-party services.
